DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/791,949.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10, 16-18 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the addition of the word "type" (line 1) extends the scope of the expression so as to render it indefinite.

Claim 16 recites the limitation "said outer row of said cam faces" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 25 recites the limitation "said concentric rows" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-7, 9-10, 22-23, 25 and 27, as understood, are rejected under 35

U.S.C. 102(e) as being anticipated by Maimone ('056).

Maimone discloses a centrifugal clutch (Fig. 3) comprising a plurality of cam members (14), a cover (26), a pressure plate (16), cam retaining means (16, 28, 46), first fastener means (92), second fastener means (70), a series of circumferentially spaced resilient biasing means (21), manual disengagement means (21), biasing/spring members (56), a control rod (102), means for connecting (18, 26, 76, 78), a threadedly adjustable stem (72), and pressure means (94).

Allowable Subject Matter

Claims 2-3, 8, and 16-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 11-15 and 19-21 are allowed.

Claims 24, 26 and 28-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US006705446B2 and US006814208B2 correspond to the related applications.
